

## *The smart solution for handling your outboard!*

Traditionally, outboard trolley's available in the market are too large and heavy, difficult to use and almost impossible to carry around in the trunk of a car or stow away on a boat. The ultimate solution has been marketed as Rooteq and now continues under the name: **ODESEA TR-60** outboard motor trolley.

The **ODESEA TR-60** outboard trolley is universal adjustable to perfectly fit any outboard engine up to 15 HP. The light weight (6kg) and compact design make sure that the TR-60 can be put almost anywhere with ease. The solid square tube design and fastening mechanism give the TR-60 the strength and stability to handle any outboard motor up to 60 kg safely and virtually without effort. Furthermore the **ODESEA TR-60** can be used for safely storing and servicing outboards.
